 - * In case of no response from secretariat of EAEP2011 within 3 days after your submission, please contact us by e-mail.
- File Type: PDF (A0 size layout)

● Notes

- Posters are printed by Secretariat of EAEP2011.
- Your poster number is assigned by Secretariat of EAEP2011 within September, 2011.
- To locate your assigned poster board on the day of your presentation, look for the board marked with the last 2 digits of your paper number. For example, if your paper number is H23A-012, your poster board is 012.
- Place the title of your paper and your paper number prominently at the top of the poster board to allow viewers to identify your poster. Indicate 1) title, and 2) authors' names.
- Indicate your title, authors' name and contact information at the top of the poster board in case the viewers are interested in contacting you for more information.
- Prepare all diagrams or charts neatly and legibly beforehand in a size sufficient to be read at a distance of 2 meters. Paragraph and figure caption text should be AT LEAST 24-point font (0.9cm height) and headers AT LEAST 36-point font (1.2cm height). Use creativity by using different font sizes and styles, perhaps even color.
- Use different colors and textures/symbols for each line or bar contained in your graph or chart. A serif font (e.g., Times) is often easier for reading main text and a non-serif font (e.g., Arial or

Helvetica) for headers and figure labels.

- Organize the paper on the poster board so it is clear, orderly, and self-explanatory. You have complete freedom in displaying your information in figures, tables, text, photographs, etc.
- Include the background of your research followed by results and conclusions. A successful poster presentation depends on how well you convey information to an interested audience.
